Eric,

Spoke with Mike Romero regarding your question on metals in the Kinder Morgan Linnton Terminal. He noted that Pb and As were detected above SLVs.

One more thing Matt, can you tell me the metals associated with riverbank contamination at Kinder Morgan and GASCO/Siltronic?

Thanks, Eric

Eric,

When you send over the Section 1 revision today can you make sure to include the language on the stormwater pathway. We want to make sure that the language includes the need for continued implementation of DEQ's stormwater program. Just want to make sure that it cannot be held up by an RP as an argument that they do not need to continue with stormwater source control efforts. Also, please copy Alex.

Thanks,

Matt McClincy
